

KOMAROCK

FOR: KOMAROCK PRIMARY SCHOOL

PROJECT SCOPE

September 19, 2022

OVERVIEW

1. Project Background and Description

Komarock Primary School is a school located in Komarock estate. Most of its processes are manual and due to various factors, there is a need to automate some of its procedures so as to enhance management of the school and also record keeping.

2. Project Scope

In order to achieve the above named, the project will implement a web-based application system. The scope will include:

- Teacher's registration and record keeping.
- Student registration and deregistration.
- Viewing of school achievements.
- Services offered by the school (such as library).
- Viewing school schedules, events as well as rules and regulations.

Functionalities implemented:

Administrator's module:

This will include:

- Student registration and deregistration.
- Teacher registration.

Home module:

This module will allow anyone accessing the website to:

- Be able to view the school achievements.
- Look at the services that the school offers such as Library.
- View the school events as well as rules and regulations.

3. High-Level Requirements

The system is web based application.

The new system will allow both internal and external users to access the application without downloading any software.

4. Deliverables

- Back-end software.
- UI Prototype.
- Web based application.
- User documentation manual.

5. Specific Exclusions from Scope

Online requests to join the school will not be catered for in this implementation but will be suggested for future updates.
